Staffordshire Surveyed in 1881-82. Re-Levelled in 1913. Boundaries Revised to 1914. Adjusted to the New Geodetic Levelling and Newlyn Datum in 1922. 270/46.

Printed on "War Substitute Paper"

Scale - Six Inches to One Statute Mile or 280 Feet to One Inch - 1/25000

The altitudes of bench marks and surface heights are given in Feet above the mean level of the sea at Newlyn, and are based on the revised primary levelling of 1912-21. Altitudes indicated thus (A.B.M. 54.7) refer to bench marks on buildings, walls, &c., those marked thus (·) preceded or followed by the height, to surface levels. The contours on this map are referred to the old Ordnance Survey Datum i.e. assumed mean sea level at Liverpool, and are not based on the revised primary levelling of 1912-21. There may thus be discrepancy of some inches between the contours and the bench marks and spot levels. Crown Copyright Reserved.

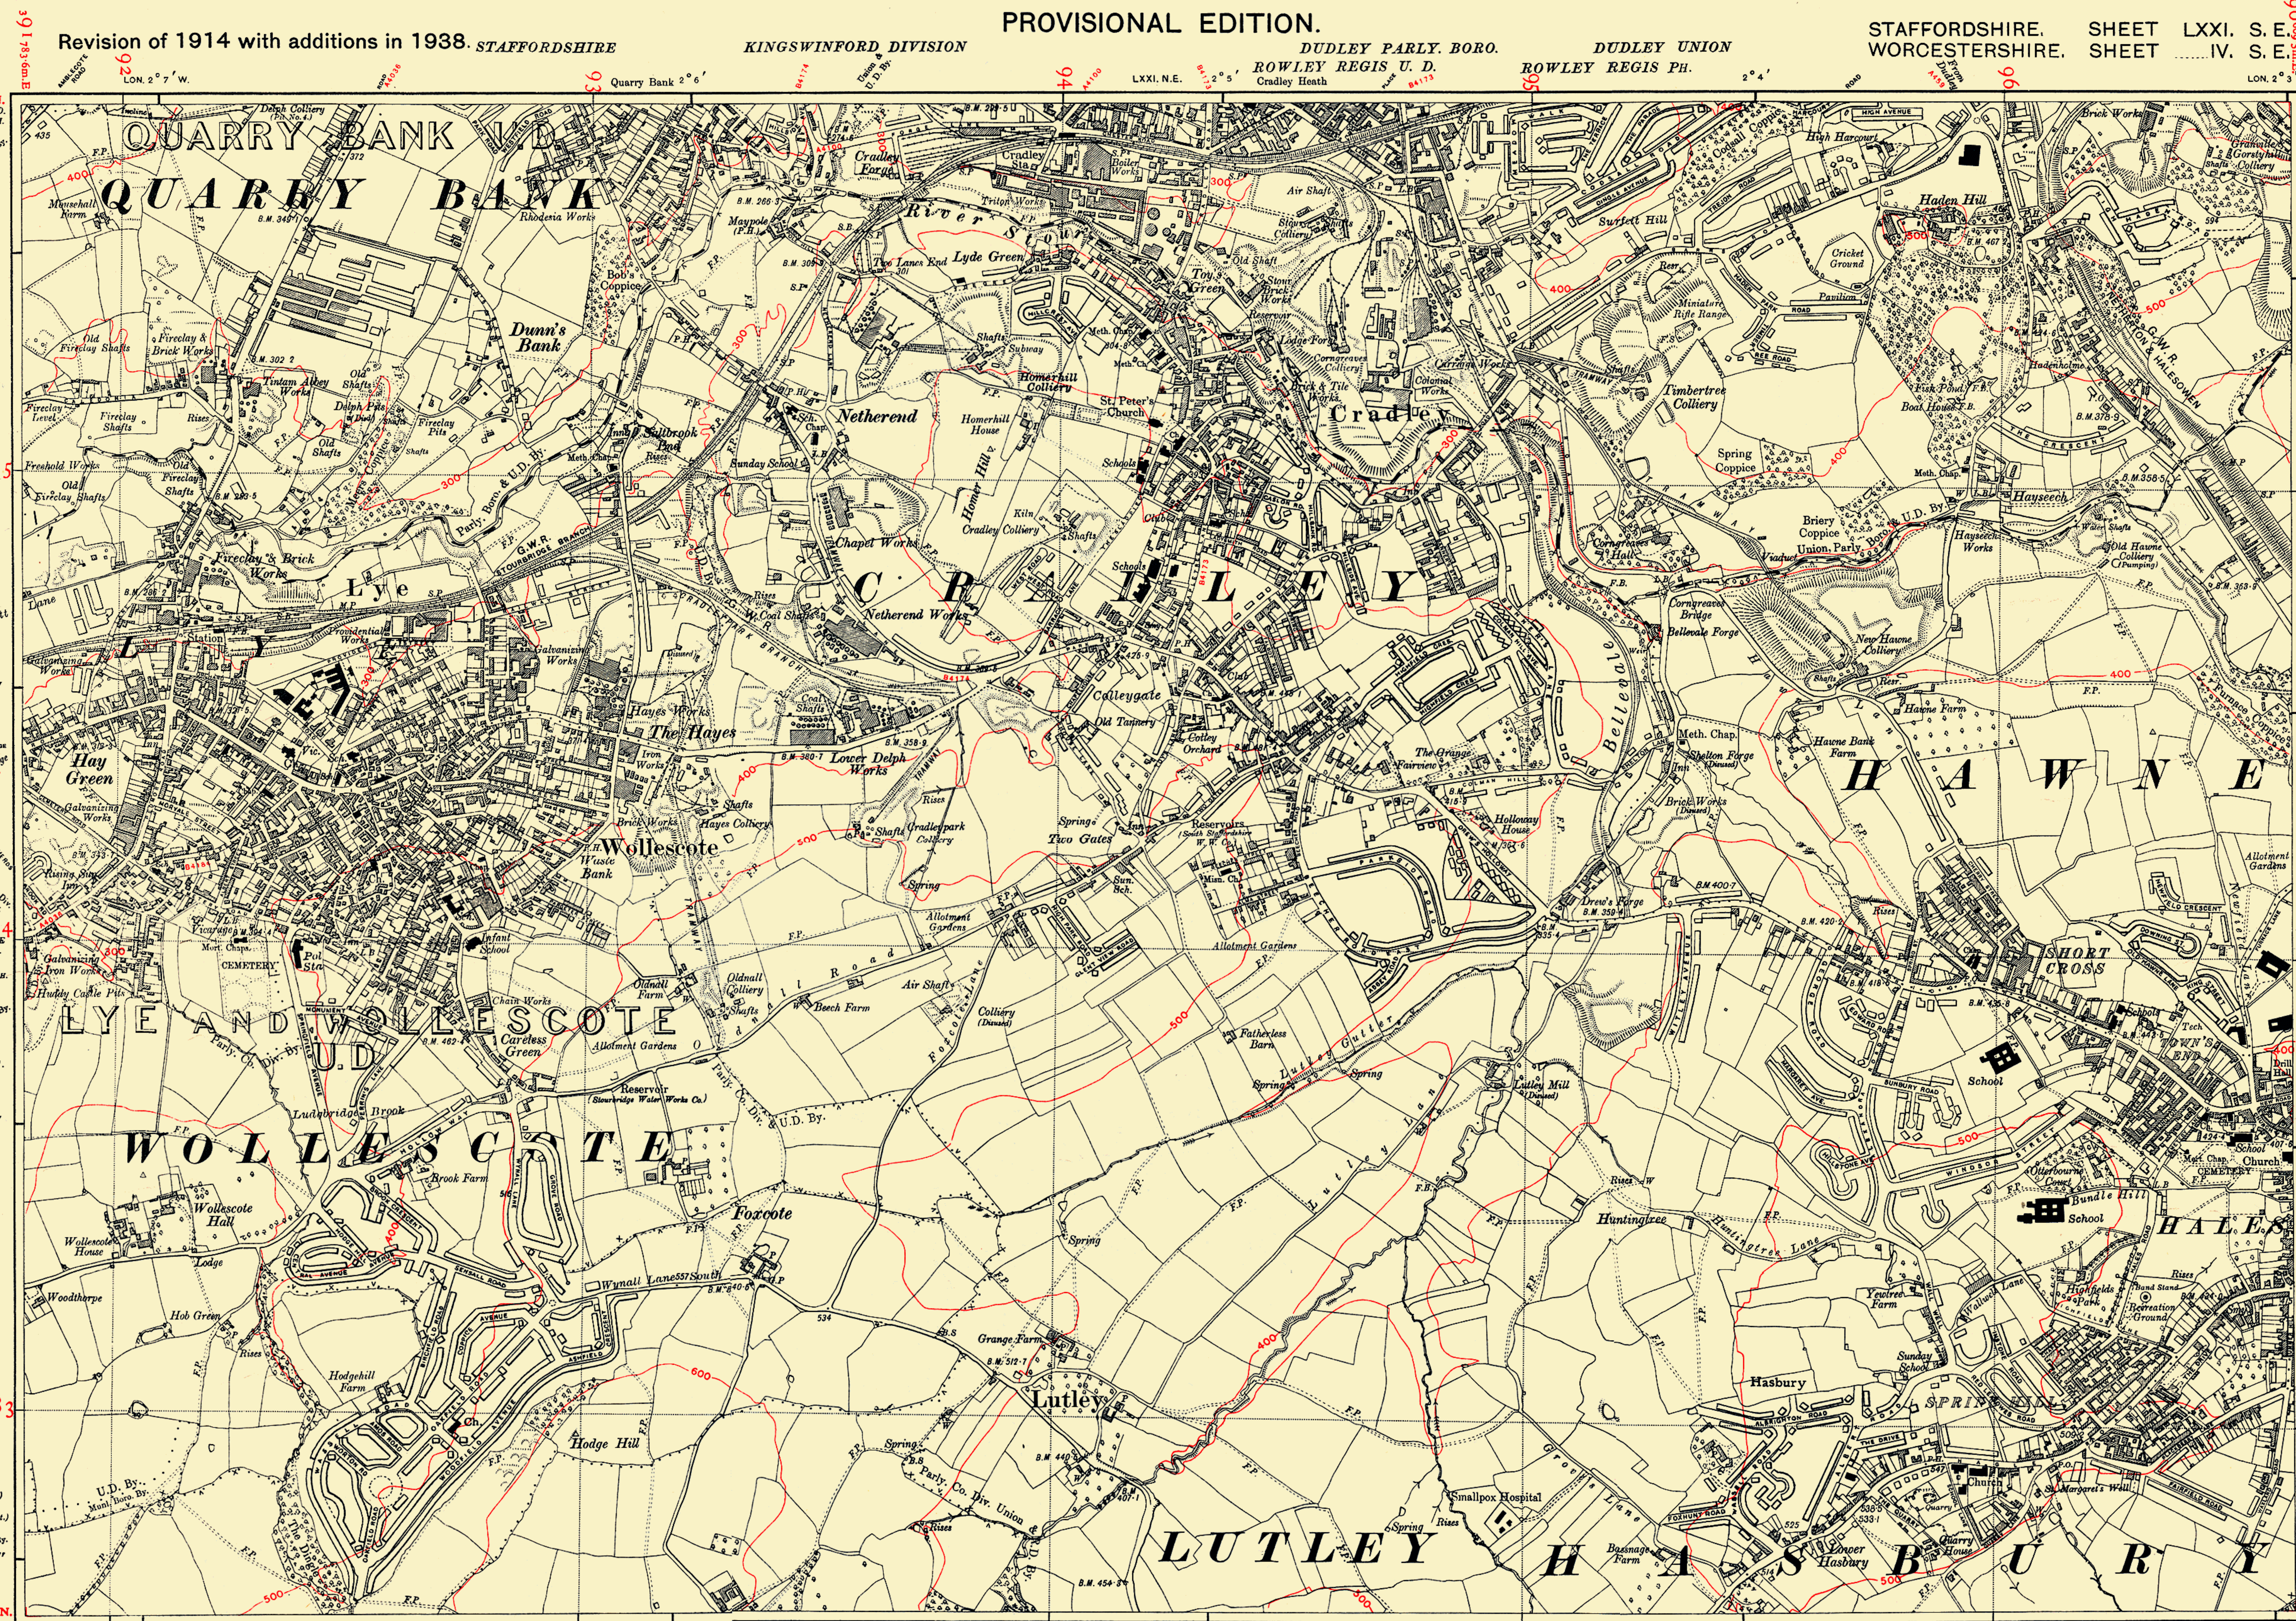

CHARACTERISTICS AND SYMBOLS table with columns for County Boundary, Parliamentary Division Boundary, Union Boundary, Rural District Boundary, Parish Boundary, Ministry of Transport Road Nos, Antiquities, Site of, Arrow, shewing direction of flow of water, Instrumental, Contours, Sketched, Trigonometrical Station.

The roads and buildings added in 1938 were surveyed by rapid methods as an emergency measure and do not conform to the accuracy of the rest of the map; consequently the boundaries in these areas do not fall in their correct positions relative to the local detail. They have therefore been omitted between the marks.

Price 2/- net.

N.B.—The representation on this map of a Road, Track, or Footpath, is no evidence of the existence of a right of way. Printed and Published by the Director General at the Ordnance Survey Office.

THE NATIONAL GRID. Includes a grid diagram with Easting and Northing coordinates, and instructions on how to use the grid for reference.
